PROFILE

Computer Science student specializing in Software Industry and Multimedia with a strong focus on Cybersecurity and Full-Stack Development. Experienced in building secure web applications using the MERN stack, and performing security testing including vulnerability assessment, network analysis, and penetration testing simulations. Passionate about offensive security, system protection, and developing scalable, secure software solutions.

EDUCATION

Faculty of Science, Alexandria University
Bachelor of Science – Software Industry and Multimedia Department
Expected Graduation: July 2028
GPA For Third Semester : 3.7
CGPA : 3.74

SKILLS

Cybersecurity & Networking

- Penetration Testing (Web & Network – Academic / Lab environments)
- Vulnerability Assessment & Security Analysis
- Network Security (ARP Spoofing, MitM concepts, Traffic Analysis)
- Network Configuration & Fundamentals (Cisco Basics)
- Linux Administration (Kali Linux)

Programming & Development

- JavaScript (Full-Stack – MERN Stack)
- Python (Automation & Security Scripts)
- C++, Java (OOP, GUI)

Web Development

- React.js, Node.js, Express.js
- REST APIs & Authentication (JWT)
- Secure Web Development Practices

Tools

- Kali Linux, Metasploit (Lab use)
- Nmap, Wireshark
- Burp Suite (Basic)
- Git & GitHub

COURSES

Software Development & Engineering

- Full-Stack Web Development (MERN Stack): Built end-to-end applications using MongoDB, Express.js, React.js, and Node.js with focus on authentication and deployment.

- **Modern Frontend Engineering:** Developed responsive, component-based applications using React.js.
- **Backend & API Development:** Designed RESTful APIs and handled server-side logic with Node.js.
- **Data Structures & OOP (C++/Java):** Strong foundation in object-oriented programming and algorithm design.
- **Database Management (MySQL):** Designed relational schemas and optimized SQL queries.
- **Problem Solving & Algorithms:** Practiced advanced problem solving on Codeforces.

Cybersecurity & Network Security

- **Ethical Hacking Fundamentals:** Understanding of security principles, threat modeling, and defensive strategies.
- **Python for Security Automation:** Developed scripts for automating security workflows and testing.
- **Network Security:** Knowledge of secure network design and traffic analysis techniques.

Artificial Intelligence

- **Basics of Artificial Intelligence:** Introduction to machine learning, search algorithms, and AI problem-solving.

PROJECTS

E-commerce Platform (MERN Stack)

Built a full-stack e-commerce platform with authentication, product management, order handling, and secure RESTful APIs. Focused on backend security, validation, and scalable architecture.

Educational Platform (MERN Stack)

Developed a full-featured learning platform with course management, user roles (Admin/Student), and structured lesson delivery. Implemented authentication, protected routes, and progress tracking.

Gym Management System (MERN Stack)

Built a web application for managing memberships, subscriptions, and user data. Included admin dashboard, analytics, and secure access control.

Medical Clinic Website (MERN Stack)

Designed and developed a responsive clinic website with appointment handling and service management. Optimized performance and user experience across devices.

Admin Dashboard System

Designed a scalable dashboard for managing products, users, orders, and analytics. Implemented role-based access control and API integration.

Network Security Analysis & Labs

Performed network analysis and security testing in lab environments using Wireshark and Nmap. Identified vulnerabilities such as ARP spoofing and traffic interception, with mitigation strategies.

Cybersecurity Automation Scripts (Lab-Based)

Developed Python and Bash scripts to automate security testing tasks and system interaction simulations. Improved efficiency in testing workflows and system behavior analysis.

Android Automation & Security Testing (Lab)

Built scripts using ADB to automate interaction testing on Android systems for security evaluation purposes. Used in controlled environments for UI behavior and system testing.

Real-time Chat Platform (ShadowNexus)

Developed a real-time chat application with optimized performance and scalable architecture. Implemented real-time communication and efficient state management.

LANGUAGES

• **Arabic:** Native

• **English:** Upper-Intermediate (Reading, Writing, Speaking)

INTERESTS

- Cybersecurity & Ethical Hacking
- Penetration Testing & Red Teaming
- Full-Stack Development
- Game Development (Basic)

PROFESSIONAL EXPERIENCE

Banque Misr – Summer Training (Internship)

Jul 2025 – Aug 2025

- Gained insights into banking operations and IT systems integration.
- Participated in sessions on digital banking, and process optimization.
